Frontend	JavaScript / jQuery, HTML5, Bootstrap
Database	MySQL, Microsoft SQL Server
Tools & Deployment	Git / GitHub, cPanel, SSL Setup, Production Deployment

WORK EXPERIENCE

Onetech Solutions — 1.5 Years

Backend Developer & IT Officer

- **UK Doctor Website | Laravel MVC**
  Delivered the website from development through production deployment, implementing the administrative panel, complete appointment management module and supporting database integration.
- **Author Publishing & Book Sales Website | Laravel MVC**
  Developed a web application enabling an author to publish books and sell them online, implementing the backend functionality to support these requirements.
- **School Management System | ASP.NET MVC**
  Contributed to backend development, implementing application functionality within an ongoing school management project.
- Additional responsibilities included networking, remote access configuration and workstation administration.

WORK EXPERIENCE - CONTINUED

Friends Bit — 1.5 Years

Junior ASP.NET Developer

- **Dubai Driving Licence Services | ASP.NET APIs**
  Developed backend APIs for a Dubai-based system managing records of international arrivals and supporting driving licence issuance workflows.
- Supported API integration with the React frontend, focusing on server-side functionality and data exchange between the interface and backend services.

Minhas Soft — 1 Year

Junior Laravel Developer

- **Aircraft-Related Application | Laravel MVC**
  Developed application modules that were deployed to the live system, contributing to the delivery of production functionality.
- Implemented Laravel MVC features using Blade templates, Eloquent ORM and Artisan workflows.
- Designed relational database schemas and developed MySQL queries to support application functionality.

ART — 1 Year

Junior Developer

- Contributed to web application development using ASP.NET and JavaScript.
- Collaborated with senior developers on debugging, application testing and code reviews.
